

# Naloxone Resources

## Naloxone Webpage

The **National Institute on Drug Abuse** created an online resource to raise awareness about naloxone.

**Substance Abuse and Mental Health Services Administration** Opioid Overdose Prevention Toolkit - Updated 2016. This toolkit equips health care providers, communities and local governments with material to develop practices and policies to help prevent opioid-related overdoses and deaths. Addresses issues for health care providers, first responders, treatment providers, and those recovering from opioid overdose.

**Prescribe to Prevent:** Here you will find information you need to start prescribing and dispensing naloxone (Narcan) rescue kits, including some useful resources containing further information about this life-saving medicine. The site was put together by prescribers, pharmacists, public health workers, lawyers, and researchers working on overdose prevention and naloxone access. Resources were compiled to help health care providers educate their patients to reduce overdose risk and provide naloxone rescue kits to patients.

The **Bureau of Justice Assistance's** Law Enforcement Naloxone Toolkit is a clearinghouse of resources to support law enforcement agencies in establishing a naloxone program.

In the toolkit you will find answers to frequent questions about naloxone and sample documents and templates, such as data collection forms, standard operating procedures, training materials, press releases, community outreach materials, and memoranda of agreement (MOA) between first responders and medical directors. These templates can be downloaded and customized for your own agency.
